

CANTECH PRECISION COATINGS INC.

Products and Services Include:

- Application of long-lasting FDA approved Teflon® coatings
- Industrial equipment cleaning and re-coating
- Release coatings for molding applications
- Corrosion resistance and protection
- Customizing product appearances
- Shielding electronics with conductive EMC coatings
- Abrasion resistant coatings
- Decorative coatings on plastics and composite materials

**TEFLON® COATINGS • CONDUCTIVE EMC • PLASTICS COATING
CHEMICAL AND CORROSION RESISTANCE • WEAR RESISTANCE**

About Cantech Precision Coatings Inc.

The production and sales team at Cantech Precision Coatings Inc. has over 50 years of combined experience in the specialized coating industry. We provide high quality coating services for industries that simply can't afford to have anything but the best in service and quality. Cantech's extensive line of coating products is the solution that you have been waiting for.

The Finishing Touch

The correct coating process is critical to the overall quality of your finished product. Whether the application includes tight tolerances or special requirements for environmental conditions, the coating process is an essential step. Our skilled finishing team brings attention to detail and process control to the next level. The result is a finished piece that conveys the highest quality and craftsmanship.

The Cantech Mission

Our capabilities include the ability to change the surface properties of metal with a variety of plastics including Teflon® and Dykor®. This allows us to incorporate the unique attributes and benefits of plastic into design applications such as food processing equipment, medical equipment and high tech electronic devices. Our mission is to use this proven technology to provide worry-free coating solutions and top quality service, thereby increasing your efficiency and product quality.
